of the southern edge of the runway toward the east; a row of 5 lamps joined the latter row at a right angle at the point of the fifth lamp; and another row of 6 lamps on poles 1.6 meter high and 50 meters apart was located on the farther extension of the southern edge of the runway. The lamps at the western and mastern ends of the runway radiated red light, while the lamps along the runway had yellow light. Construction on the northern taxiway had started. (4) The area was staked off. A wire or board fence surrounded the entire landing field.
